Changelog

Date	Comments
1/24/2019	Added rider details to product listing section.
3/29/2019	Addition of new Extend/Renew API endpoint (end of document)
3/29/2019	Updates to Patriot Travel Medical Insurance, Patriot America Plus, Patriot Platinum, and Visitors Care to align with product changes effective 5/1/2019.
4/8/2019	Removing riders from the Product Listing that will no longer be available under Patriot Platinum as of 5/1/2019.
4/22/2019	Adding requestedTotal field to the PaymentInfoDto for each product. This can be utilized to ensure premium matching upon submitting a purchase.
4/29/2019	Removed optional Rider for Visitors Care that will no longer be available for the 0519X app types. Also, removed the requirement for collection of dateOfUsArrival for Visitors Care.
5/31/2019	Updates to Patriot Exchange Program and Student Health Advantage (standard and Platinum) to align with product changes effective 6/5/2019. Please use updated appType as shown.
9/18/2019	Corrected App Types in the Product Listing table.
12/3/2019	Added Section for Renewal Retry Payment
8/28/2020	Updating with Patriot America Plus/Patriot Platinum product Changes Effective 9/1/2020.
9/15/2020	Updated with New York changes (Billing)
1/6/2021	Updated with New York changes (Mailing and Residence)
3/5/2021	Updated with PEP/SHA app type and visa changes
3/31/2021	Updating Outreach and Patriot Series/VIC with fulfillment/maximum limit/app type changes

Overview

This document covers the basic architectural components to connect to IMG's API as well as what is needed before getting started. Once complete, you will be able to access IMG's Quoting and Purchase endpoints. The end points covered in this document are organized around [RESTful](#) API's which uses [OAuth 2.0](#) based Centralized Authorization Server. All request and response bodies, including errors, are encoded in [JSON](#) and should be made over [SSL](#).

To ensure an optimal testing experience, we provide a Beta API to use before going live with our production API. To play around with a few scenarios, we recommend using a REST client called [Postman](#). We also leverage [Swagger UI](#) to make it easier to visualize and interact with our API resources. These will be discussed in more detail below.

Getting Started

Before you can begin using IMG's API, **you must be licensed to sell with IMG** along with having active **Producer login credentials**. If you are currently licensed and have login credentials, you can skip this step. For those needing Producer login credentials, please choose from below:

- If you are a current licensed health insurance provider but **not yet contracted with IMG**, [click here](#).
- If you are **currently contracted with IMG** but still need Producer login credentials, [click here](#).

Environments

IMG has two different environments that can be used but initial development should start with our Beta (Test) environment before switching to production to ensure requests are working as expected. You will be provided an access token to access both Beta and Production URL's below.

- **Beta URL (Test):**
<https://beta-services.imglobal.com/API/>
- **Production URL:**
<https://services.imglobal.com/API/>

Company Confidential — Proprietary

This document includes product and company information that is strictly confidential. This document is proprietary to IMG, Inc. and is intended for distribution only within the company and to approved parties.
© Copyright 2026 by International Medical Group, Inc. All rights reserved.

Authorization

Authorization Request

All API endpoints require authorization. Once you are registered and have an active producer login, IMG will need to provide you username/password credentials for API access. To request these credentials, please contact IMG at api@imglobal.com.

NOTE: These login credentials are **not the same as your Producer login credentials** and will only be used to authorize access to our API endpoints along with associating the appropriate product types you are currently licensed to sell.

Obtaining an Access Token

Once you are provided with the appropriate credentials, you can then use the authorization server to obtain an OAUTH 2 access token with a post request (see below):

- **Posting URL (Beta / Testing):**
<https://beta-services.imglobal.com/oauth/token>
- **Posting URL (Production):**
<https://services.imglobal.com/oauth/token>
- **With the posted content as:**
grant_type=password&username=abc&password=xyz
- **Responses from the call:**
HTTP status code 200: successful call with the string of token returned.
HTTP status code 401: access denied

NOTE: This token has an expiration time of 30 minutes.

Calling API with Access Token

After obtaining the access token, you can now make API calls with a [Bearer Authorization Header Call](#) with the token value obtained.

Company Confidential — Proprietary

This document includes product and company information that is strictly confidential. This document is proprietary to IMG, Inc. and is intended for distribution only within the company and to approved parties.

Credential/Account Management

Account Creation

For each Producer who needs to access IMG's API, a **MyIMG account** will need to be created by IMG. This account will be associated with the certificates and resources relating to the specified Producer. So, when the Producer logs in with this account, only the related information will be returned from any API calls.

NOTE: This account only grants API access and **will not be the same as your Producer Portal login credentials**. Sometimes a Producer may have a group administration account to login to MyIMG. This account can login into MyIMG but doesn't have the same access as the regular group admin account. This will provide better account management policies for you.

Account Self-Management

You can login to [MyIMG](#) to manage your password and emails for this API account. After login, click Manage Account > My Profile to get to the profile page as follows:

Forgot your password?

No problem. Just enter your user ID and we'll email you a link so you can create a new password. Your user ID may be your email address or a unique ID that you created.

Enter User ID *

Email Password

NOTE: IMG's beta testing environment is refreshed every Sunday morning with the production back up as of 12:00am. This means as of the end of the day Saturday. This refresh also affects the password used to gain tokens and authentication. If you have reset your production password, it will not take effect in the beta environment until the following refresh. Please be mindful of this whenever you have performed a password change within MyIMG.

Product Listing

Below is a list of all available products that can be accessed through the API. Please note that while the list below displays all available products through IMG's API, your authorization will only associate the appropriate product types you are currently licensed to sell.

Available Optional Riders are listed for each product below. Instructions on how to add these riders to an API request and other associated rules are outlined in the [Purchase API](#) section for each individual product. For rating information on each rider, you may refer to the product Brochure links in the table below. For detailed information about each rider's coverage, please refer to the Rider Document link listed next to each.

Product Code	App Type	Product Description	References
PATRIOT TRAVEL			
PATAI	Effective 10/1/2025: 1025	Patriot America Lite	Brochure Sample Certificate

Trip Cancellation and Interruption	When applicable, travel dates will automatically extend up to the maximum allowable 31 days.	No	No	No
------------------------------------	--	----	----	----

*No longer available for new business beginning 5/11/2022

Quote API

The Quote API may be utilized to retrieve the total cost of a policy, including its included optional coverages and miscellaneous fees, prior to submitting a request for purchase under the Purchase API. The Quote API is essentially a skimmed down version of the Purchase API that excludes most demographic and all payment information.

For purposes of ease, the data elements outlined below for the API only includes information pertinent to allowed values and rules that are valid across all products. For many of the data elements, however, you will need to refer to the specific product within the Purchase API section for the allowed values and associated rules.

The data objects and data elements that are present in the Quote API are included in the same structure and as the same name in the Purchase API.

Quote Swagger UI

Please refer to the swagger documentation below for **code models and structure** on our Quote API requests and responses (recommended).

- **Beta / Testing URL** (use for future/upcoming product release changes)
https://beta-services.imglobal.com/API/swagger/ui/index#!/Quotes/Quotes_GetQuote
- **Production URL**
https://services.imglobal.com/API/swagger/ui/index#!/Quotes/Quotes_GetQuote

Data Object: CertificateQuoteQuery (Root Level)

This is the root-level data object that lays the foundation for the API Request.

Data Elements

Data Element	Allowed Values / Format	Rules	Required
producerNumber (string)	<Unique IMG Producer Number>		Yes
productCode (string)	See individual products in Purchase API section		Yes
appType (string)	See individual products in Purchase API section		Yes
travelInfo	Include TravelInfoDto data object	See Data Object: TravelInfoDto	Yes
policyInfo	Include PolicyInfoDto data object	See Data Object: PolicyInfoDto	Yes
families (Array)	Include FamilyDto data object	See Data Object: FamilyDto	Yes
riders	See individual products in Purchase API section		No
productOptions	N/A	Not used for these products	No

Error Responses

Data Element	Condition	Response Message
producerNumber	Empty or Null	Producer Number is required.
productCode	Empty or Null	productCode is required.
productCode	Not an existent product code value	The value entered for ProductType is invalid.
appType	Empty or Null	appType is required.

Company Confidential — Proprietary

This document includes product and company information that is strictly confidential. This document is proprietary to IMG, Inc. and is intended for distribution only within the company and to approved parties.
© Copyright 2026 by International Medical Group, Inc. All rights reserved.

travelInfo	TravelInfoDto data object not included	Travel Info section is required.
policyInfo	PolicyInfoDto data object not included	Policy Info section is required.
families	FamilyDto not included	Must have at least one family. <i>[Note: Family can be comprised of one individual.]</i>

Broken Rule Responses

Data Element	Condition	Response Message: [{"ruleGroupId"."id"} Name]
See individual products in Purchase API section		

Data Object: TravelInfoDto

This gathers general information regarding the travel details. This object is held by the [CertificateQuoteQuery](#) object's **travelInfo** data element.

Data Elements

Data Element	Allowed Values / Format	Rules	Required
startDate (string)	Valid date format	Must be in the future.	Yes
endDate (string)	Valid date format	See individual products in Purchase API section	Yes
destinations (Array[string])	3-character country code; See Appendix	See individual products in Purchase API section	Yes
isCurrentlyLocatedInFlorida (Boolean)	True (1) / False (0)	See individual products in Purchase API section	No
hasNewYorkPhysicalLocation (Boolean)	True (1) / False (0)	See individual products in Purchase API section	No

Company Confidential — Proprietary

This document includes product and company information that is strictly confidential. This document is proprietary to IMG, Inc. and is intended for distribution only within the company and to approved parties.

Error Responses

Data Element	Condition	Response Message
startDate	Provided Date not a future date.	Start Date cannot be the current date or in the past.
startDate	Empty or Null	Start Date is required.
endDate	Empty or Null	End Date is required.
endDate	Provided endDate is more than one year after the provided startDate	End Date cannot be more than one year after the Start Date.
endDate	Provided endDate is before the provided startDate	End Date must be after Start Date.
destinations	Empty or Null	Must have at least one Destination.

Broken Rule Responses

Data Element	Condition	Response Message: [{"ruleGroupId"."id"} Name]
See individual products in Purchase API section		

Data Object: PolicyInfoDto

This gathers general information regarding the basic coverage details and handling of the certificate. This object is held by the [CertificateQuoteQuery](#) object's **policyInfo** data element.

Company Confidential — Proprietary

This document includes product and company information that is strictly confidential. This document is proprietary to IMG, Inc. and is intended for distribution only within the company and to approved parties.

Data Elements

Data Element (data type)	Allowed Values	Rules	Required
deductible (number)	See individual products in Purchase API section		Yes
maximumLimit (number)	See individual products in Purchase API section		Yes
currencyCode (string)	USD	All products are available only in U.S. Dollars	Yes
fulfillmentMethod (string)	“Online” “Standard” “Express”	Selecting “Express” will add \$20.00 or \$50.00 to the cost of the policy. Some products don’t allow “Standard”. Refer to Specific products in Purchase API section.	Yes

Error Responses

Data Element	Condition	Response Message
deductible	Empty or Null	Deductible is required.
maximumLimit	Empty or Null	Maximum Limit is required.
currencyCode	Empty or Null	Currency Code is required.
fulfillmentMethod	Empty, Null, or Invalid	Fulfillment Method is invalid

Broken Rule Responses

Data Element	Condition	Response Message: [(“ruleGroupId”.”id”) Name]
See individual products in Purchase API section		

Company Confidential — Proprietary

This document includes product and company information that is strictly confidential. This document is proprietary to IMG, Inc. and is intended for distribution only within the company and to approved parties.
 © Copyright 2026 by International Medical Group, Inc. All rights reserved.

Data Object: FamilyDto

This gathers general information regarding the travel details. This object is held by the [CertificateQuoteQuery](#) object's **family** data element.

Data Elements

Data Element	Allowed Values / Format	Rules	Required
insureds (array[InsuredDto])	InsuredDto required		Yes

Error Responses

Data Element	Condition	Response Message
insureds	Empty or Null	Must have at least one Insured.

Broken Rule Responses

Data Element	Condition	Response Message: [{"ruleGroupId"."id"} Name]
N/A	N/A	N/A

Data Object: InsuredDto

This holds an array and gathers general information regarding the applicants' personal details. This object is held by the [FamilyDto](#) object's **insureds** data element.

Data Elements

Data Element (data type)	Allowed Values / Format	Rules	Required
dateOfBirth (string)	Valid date format		Yes
citizenship (string)	3-character country code; See Appendix	See individual products in Purchase API section	Yes

Company Confidential — Proprietary

This document includes product and company information that is strictly confidential. This document is proprietary to IMG, Inc. and is intended for distribution only within the company and to approved parties.
© Copyright 2026 by International Medical Group, Inc. All rights reserved.

residence (string)	3-character country code; See Appendix	See individual products in Purchase API section	Yes
travelerType (string)	• 'Primary' • 'Spouse' • 'Child'		Yes
productOptions (array[ProductOptionDto])	ProductOptionDto	See individual products in Purchase API section	No
riders (string)	See individual products in Purchase API section		No

Error Responses

Data Element	Condition	Response Message
firstName	Empty or Null	First Name is required.
lastName	Empty or Null	Last Name is required.
dateOfBirth	Empty or Null	Date of Birth is required.
citizenship	Empty or Null	Citizenship is required.
travelerType	Empty or Null	Traveler Type is required.
travelerType	Allowed Value not presented.	Traveler Type is invalid.
travelerType	More than one 'Primary' in an array	Only one Primary allowed per family.
travelerType	More than one 'Spouse' in an array	Only one Spouse allowed per family.

Company Confidential — Proprietary

This document includes product and company information that is strictly confidential. This document is proprietary to IMG, Inc. and is intended for distribution only within the company and to approved parties.

Broken Rule Responses

Data Element	Condition	Response Message: [{"ruleGroupId"."id"} Name] "Failure"
See individual products in Purchase API section		

Data Object: ProductOptionsDto

This data object is held by the [InsuredDto](#) **productOptions** data element or [CertificateQuoteQuery](#) **productOptions** data object (as appropriate) if the specific option is desired; otherwise, it may be left off. Refer to the [Purchase API](#) section for a specific product to determine which of the two objects should hold the [ProductOptionsDto](#) object.

Data Elements

Data Element (data type)	Allowed Values / Format	Rules	Required
productOptionType (string)	See individual products in Purchase API section		Yes
selectedValue (string)	See individual products in Purchase API section		Yes

Error Responses

These errors apply only if the object is presented.

Data Element	Error	Response Message
productOptionType	Empty or Null	Product Option Type is required.
productOptionType	Empty or Null	Product Option Type is invalid.

Broken Rule Responses

Data Element	Condition	Response Message: [{"ruleGroupId"."id"} Name] "Failure"
See individual products in Purchase API section

Purchase API

The Purchase API is the request you submit once you have compiled all required and optional information, including demographic and payment information. The following pages detail the complex rules and validations that our system performs to help you gather the appropriate information for the specific product you are selling.

Purchase Swagger UI

Please refer to the swagger documentation below for **code models and structure** on our Purchase API requests and responses (recommended).

- **Beta / Testing URL** (use for future/upcoming product release changes)
https://beta-services.imglobal.com/API/swagger/ui/index#!/Purchases/Purchases_GetCertificate
- **Production URL**
https://services.imglobal.com/API/swagger/ui/index#!/Purchases/Purchases_GetCertificate

Patriot Travel Medical Insurance

Data Object: Certificate Query (Root Level)

This is the root-level data object that lays the foundation for the API Request.

Data Elements

Data Element	Allowed Values / Format	Rules	Required
producerNumber (string)	<Unique IMG Producer Number>	String	Yes

Company Confidential — Proprietary

Renewal API

The Renewal API may be used to renew coverage for insureds (via the 'Purchase' [requestType](#)) or to retrieve the total cost of a renewal prior to submitting a request for renewal (via the 'Quote' [requestType](#)). You can also use it to mimic a renewal purchase to help validate that you are passing all the information necessary for the actual purchase (via the 'Preview' [requestType](#)).

Renewal vs Extension

As noted below, some data elements and certain riders are only available at "Renewal" or at "Extension". It should be noted that a renewal is a repurchasing a full year of coverage, whereas an extension is adding coverage to an existing policy where coverage doesn't currently span an entire year.

Renewal Swagger UI

You may refer to our swagger documentation for models and structure of the request and response of the Renewal API at the following links:

- **Beta / Testing URL** (use for future/upcoming product release changes)

cardCVV	Empty or Null when paymentType is 'CreditCard'	Security Code is required.

Appendix A

Trip Cancellation and Interruption Coverage

The Trip Cancellation and Interruption Coverage is available on the products indicated in the [Product Listing](#). The following provides the relevant instructions for the payload that should follow the submission of the Travel Medical payload where the optional coverage is being added. Please note that adding this additional coverage will result in a second charge to the individual's credit card (separate from the charge processed for the Travel Medical coverage). In the event that the second charge is declined, the first charge will be refunded, and the Travel Medical certificate will be cancelled. The applicant would need to repeat the application for both the initial Travel Medical certificate and the additional Trip Cancellation and Interruption Coverage policy.

API Errors

Data Element	Condition	Response Message
dateOfBirth	Empty or Null	Date of Birth is required.
dateOfBirth	Invalid value	All traveler Birth Years cannot be blank and must be valid four digit years.
tripCost	Empty or Null	Trip Cost is required

Broken Business Rules

Data Element	Condition	Response Message: [{"ruleGroupId"."id"} Name]
dateOfBirth	The date provided implies the traveler's age is greater than the maximum age for the chosen policy.	The age of one or more of the travelers is greater than the maximum age for the chosen policy.

Purchase API

The Purchase API is the request you submit once you have compiled all required and optional information, including demographic and payment information. The following pages detail the complex rules and validations that our system performs to help you gather the appropriate information for the specific product you are selling.

Purchase Swagger UI

You may refer to our swagger documentation for models and structure of the request and response of the Purchase API at the following link:
