Overview

This document covers the basic architectural components to connect to IMG's API as well as what is needed before getting started. Once complete, you will be able to access IMG's Quoting and Purchase endpoints. The end points covered in this document are organized around [RESTful](#) API's which uses [OAuth 2.0](#) based Centralized Authorization Server. All request and response bodies, including errors, are encoded in [JSON](#) and should be made over [SSL](#).

To ensure an optimal testing experience, we provide a Beta API to use before going live with our production API. To play around with a few scenarios, we recommend using a REST client called [Postman](#). We also leverage [Swagger UI](#) to make it easier to visualize and interact with our API resources. These will be discussed in more detail below.

Environments

IMG has two different environments that can be used but initial development should start with our Beta (Test) environment before switching to production to ensure requests are working as expected. You will be provided an access token to access both Beta and Production URL's below.

- **Beta URL (For Testing Purposes):**
<https://beta-services.imglobal.com/API/>
- **Production URL:**
<https://services.imglobal.com/API/>

Authorization

Authorization Request

All API endpoints require authorization. Once your contract is processed, IMG will need to create your account and provide credentials for API access. **To request these credentials**, please contact IMG at will.murray@imglobal.com

NOTE: These login credentials are **not the same as your agent portal login credentials** and will only be used to authorize access to our API endpoints along with associating the appropriate product types you are currently licensed to sell.

Company Confidential — Proprietary

This document includes product and company information that is strictly confidential. This document is proprietary to IMG, Inc. and is intended for distribution only within the company and to approved parties.
© Copyright 2026 by International Medical Group, Inc. All rights reserved.

Obtaining an Access Token

Once you are provided with the appropriate credentials, you can then use the authorization server to obtain an OAUTH 2 access token with a post request (see below):

- **Beta Posting URL (For Testing Purposes):**
<https://beta-services.imglobal.com/oauth/token>

Production Posting URL:
<https://services.imglobal.com/oauth/token>

- **With the posted content as:**
grant_type=password&username=abc&password=xyz
- **Responses from the call:**
HTTP status code 200: successful call with the string of token returned.
HTTP status code 401: access denied

NOTE: This token has an expiration time of 30 minutes.

Calling API with Access Token

After obtaining the access token, you can now make API calls with a [Bearer Authorization Header Call](#) with the token value obtained.

Credential/Account Management

Account Creation

For each agent who needs to access IMG's API, a **MyIMG account** will be created after your [authorization request](#) has been completed. This account will only be associated with the certificates and resources relating to the specified agent. So, when you login with this account, only the related information will be returned from any API calls.

NOTE: This account only grants API access and **will not be the same as your agent portal login credentials**. Sometimes an agent may have a

Company Confidential — Proprietary

group administration account to login to MyIMG. This account can login into MyIMG but doesn't have the same access as the regular group admin account. This will provide better account management policies for you.

Account Self-Management

Once IMG has provided your credentials, you can login to [MyIMG](#) to manage your password and emails for this API account. After login, click Manage Account > My Profile to get to the profile page as follows:

The screenshot displays the 'My Profile' page with two main sections: 'Manage Password' and 'Manage Email Address'.

Manage Password

- Current Password: *
- New Password: *
- Confirm New Password: *
- Link: ? Password Rules
- Button: Update Password

Manage Email Address

- Email Address: test@email.com
- New Email Address: *
- Confirm Email Address: *
- Button: Update Email Address

Reset / Forgot Password

If you happen to forget or want to reset your password, you can do so using the URL below. Enter your MyIMG username and a temporary password will be sent to your email.

Company Confidential — Proprietary

Forgot your password?

No problem. Just enter your user ID and we'll email you a link so you can create a new password. Your user ID may be your email address or a unique ID that you created.

Enter User ID *

Email Password

NOTE: IMG's beta testing environment is refreshed every Sunday morning with the production back up as of 12:00am. This means as of the end of the day Saturday. This refresh also affects the password used to gain tokens and authentication. If you have reset your production password, it will not take effect in the beta environment until the following refresh. Please be mindful of this whenever you have performed a password change within MyIMG.

Product Listing

Below is a list of all available products that can be accessed through the API. Please note that while the list below displays all available products through IMG's API, your authorization will only associate the appropriate product types you are currently licensed to sell.

Product Name	productCode	appType	State Availability	References
iTravelInsured Choice	TCCH	0925	All states except ID, IL, MN, MO, MT, ME, NH, NY, OR, UT, WA	For use with Cruise, Sport, CFAR, and Enhanced Medical Buy-Up options

Quote API

The Quote API may be utilized to retrieve the total cost of a policy, including its included optional coverages and miscellaneous fees, prior to submitting a request for purchase under the Purchase API. The Quote API is essentially a skimmed down version of the Purchase API that excludes most demographic and all payment information.

The data objects and data elements that are present in the Quote API are included in the same structure and same names as in the Purchase API.

Company Confidential — Proprietary

This document includes product and company information that is strictly confidential. This document is proprietary to IMG, Inc. and is intended for distribution only within the company and to approved parties.
